BABTAC Skin Needling/Derma-Rolling/Micro Needling increased needle length extension

This policy is hereby extended to include Skin Needling using BABTAC approved products subject to the following conditions:

- A new unit is used for each new client and is allocated to that client only by a numbering system. Such units are to have been irradiated before delivery to the salon by the supplier or maker.
- After each use such items are to be sanitized according to the makers specifications and instructions
- Client to be given adequate pre and post treatment information as to potential side effects and aftercare instructions
- Maker's consultation and consent forms signed by the client and makers own leaflets to be used and be kept for a minimum period of 7 years
- Maximum needle length must not exceed 1mm roller or 1.5mm stamp for facial treatments and 3mm for body treatments.

Subject to all other terms and conditions of the policy.
